ACPred-FL

A sequence-based predictor for identifying anti-cancer peptides from proteins

Please choose one preferred prediction mode:

Prediction mode?

Input your long protein sequences below for the identification of anti-cancer peptides:
(click here for example)

Upload your file: [   ] Browse...   Upload

Choose confidence 0.5 ∨

Input the cutting length： 11~40

✔ Submit   Reset

Classification mode?

Input your peptide sequences below for classification: (click here for example)

Upload your file: [   ] Browse...   Upload

Choose confidence 0.5 ∨
